President, Editor: Howard Gates

Vice-President: Louis E. Repeta

Volume XIV, No. 6 (#82)

June 1992

Founded 1978

And The Winners Are--

It's a pleasure to report that, according to Lou Repeta, who counted them, 40 ballots were cast in the election of EFOCC officers and board members. Officers ran unopposed, except for possible write-ins, of which there were none. The successful candidates were—

President, Jim Cotter Vice President, Walt Cole Secretary, Jim McDevitt Treasurer, Don Reinke.

There was actual competion in the race for Executive Board Member At Large. There were three candidates for two seats, and the balloting was very close; it finished as follows—

Tim Lindemuth, 29 votes; Joe Licata, 27 votes; Mike Perry, 23 votes.

Thus, as of 1 July, the seven-member Executive Board will comprise Cotter, Cole, McDevitt, Reinke, Lindemuth, Licata— and Gates, as editor of *The EFO Collector*, the only non-elected member of the Board.

So this is my swan song as president. I'm delighted to retire in favor of energetic and highly focused Jim Cotter— and I think we'll have a better club with his accession. My gratitude to all those who helped me during the past two years, and my congratulations to the winners.

-- Howard Gates

STAMPOREE Was Good To Me (I Think)--

It was a pleasant weekend in West Palm Beach. It was good to meet the folks of the Florida Federation of Stamp Clubs. It was fun to inspect the exhibits. And it was rewarding to tour the bourse (except for the exhaustion of my feet and my wallet).

But did I act too fast? Is this 20c America's Libraries albino really a legitimate error, even with its Philatelic Foundation certificate? Or is it just printer's waste?

I'm not concerned about the legitimacy of my second purchase, the makeup rate pair, imperforate horizontally. And the price was right.

But my favorite buy was a badly-toned cover from the 1850s, bearing the manuscript postmark "Wilderness, Va." and addressed to a lawyer in Rackoon Ford, Culpeper County. Wilderness is my Ol' Virginny Home, and those postmarks are hard to come by.

--Howard Gates

Three Fascinating Freaks--

The marbled bust of Washington

On the left-hand stamp of the trio below, olive-green ink has mottled the profile of George Washington. Smearing the Father of Our Country? Shame!

The striped Madonna

Can anyone tell us what caused the contemporary stripes to be imposed on this Madonna and Child classic by Tiepolo?

The spying-eye blanket

Security is tight in the Museum of the American Indian— the guard peers out at museum—goers through holes in the Navajo blanket. Those holes are black rings filled with white; printer's doughnuts?

BEST SELLING BOOKS

U.S. Errors - 1992 Edition is the most comprehensive catalogue of U.S. major errors stamps ever published. It has become the standard reference for U.S. major errors. It lists, illustrates, and prices every U.S. imperforate (including all known imperf PNC strips), color omitted error, and invert.

U.S. Errors is loaded with footnotes (such as which errors usually are encountered in poor condition) and cautions about which errors are faked (and there are dangerous fakes out there!). Quantities known for each issue are noted. A dealer directory lists the most active dealers in the U.S. error market.

Whether you're buying or selling, or just want to be aware of what's out there in case you come across something unusual, *U.S. Errors - 1992* is a must!

U.S. Errors - 1992 \$12.95 Autographed, Hardbound, Limited Edition \$30.00

Top Dollar Paid! has become one of the best selling books in philately. It's really two books in one: a concise guide to what works best in selling, and an entertaining behind-the-scenes journey into the real-life world of stamp dealing. It's been critically acclaimed as the best book ever written on the subject.

Even if you're not in the market to sell right now, perhaps the greatest service *Top Dollar Paid!* performs is to make you aware of the financial consequences of purchases you're making today. *All stamps are not created equal! Top Dollar Paid!* could be worth hundreds or even thousands of dollars to you.

Top Dollar Paid! \$9.95 Autographed, Hardbound, Limited Edition \$30.00

The Wild Side, the second in Datz's trilogy about the stamp business, is a journey into the side of stamp dealing you never hear about. In stories drawn from Datz's own first hand experiences you'll meet rip-off artists, credit card scammers, master's of the big con (yes, big cons are alive and well), murderers, shadowy travelling men who sell stamps too good to be true (regummed, reperfed, etc.) You'll meet a variety of con men, rascals, scoundrels, eccentrics and characters, and delightfully entertained by incredible true adventures from a side of philately you never imagined: The Wild Side! Once you start reading, you won't be able to put it down!

The Wild Side \$9.95 Autographed, Hardbound, Limited Edition \$30.00

On The Road, the third in Datz's trilogy, is for every soul who's ever dreamed of running away to join the circus or imagined stamp dealing to be a travel poster existence of jetting away to distant cities, handling rare stamps every day, dining out every night, leading a life of adventure!

What an odyssey. Missed planes, broken-down cars, third-rate hotels, blizzards, thieves, wild goose chases, slow shows, enigmatic millionaires, the tantalizing promise of inverts at the truckstop in Last Chance, Arizona, and even tornados.

On The Road takes you from the bright lights of the big cities to the desolate hinterlands of Wyoming, Arizona, and New Mexico. Along the way, you'll be charmed and entertained by some of the most unconventional, unpredictable, and outrageous true-life characters in philately.

On The Road \$9.95 Autographed, Hardbound, Limited Edition \$30.00

"Exists Miscut;"

Coil Imperforates With Marginal Markings: A New Collecting Specialty?--

This article combines the input of Mike Perry, who provided plate layout data and many of the illustrations, with that of editor Howard Gates, who wrote the text.

It isn't often that a collecting opportunity arises that will regenerate the thrill of the search. But here's a possibility: the double error of coil pairs that have no perforations and are so grossly miscut that sheet-margin markings appear. Often, as a bonus, these double errors lack denomination, country of origin, or some other major portion of the stamps' inscriptions.

We're all familiar with coil pairs that are imperforate, but probably less well-acquainted with coil pairs that that display sheet markings at top or bottom. In the examples shown here, those failings are combined. Not only are the coil pairs imperforate, they are so miscut that they carry electric-eye bars from the top of the sheet, or dashes, sheet guidelines, or other markings from the sheet bottom. That combination greatly increases their scarcity.

Coil stamps are printed in side-by-side strips on a continuously-fed roll of stamp paper (the "web"). After printing, the paper is perforated and slit into individual coil strips. Starting in 1958 with the 432-subject coil printing-plate layout, the plate was 18 coil strips wide. Later, on the C press, the width was 18 or 20 coil strips, and on the D press, 20 strips. So the chance that a miscut coil comes from the top of the plate and is printed with electric-eye bars is one in eighteen or one in twenty. The same odds apply to a miscut coil strip's being printed with bottom-margin plate markings. The chances that stamps that are imperforate are also grossly miscut can only be guessed at; we might guess that the odds are much less than one in ten that when a new web is being started through the press, gross slitter misalignment and non-perforation occur

simultaneously and undetected by inspectors. Combining these odds with those that a miscut strip comes from the top or bottom of the sheet makes imperforate coil pairs with marginal markings 90 or more times scarcer than ordinary imperfs.

Stephen R. Datz's fine catalog, *U.S. Errors*, lists coil imperforate pairs and their estimated quantities. For the first of our examples, the 4c Lincoln imperf coil of 1958, Scott 1058a, Datz reports a quantity of 500+ imperf pairs. But there are 47 pairs, all in one roll, known imperf with EE bars at the top, suggesting that either Datz's quantity estimate or our probability guess may need correction.

Datz also reports 500 pairs of the imperforate 8c Flag Over the White House, Scott 1338Gh. It is shown here with full plate number and EE dashes at the bottom.

The 8.4c Steinway Grand Piano of 1978, Scott 1615Cf, imperforate, EE bars in upper margin, is shown below. Datz reports a quantity of a "few thousand pairs" for the imperf precanceled with lines only (no town).

Continued on the next page

"Exists Miscut;"
Coil Imperforates With Marginal Markings:
A New Collecting Specialty?--

Continued from the preceding page

The 15c Fort McHenry Flag imperf coil, Scott 1618Cd, Datz quantity "several thousand pairs," is shown here in a strip of five with tips of dark blue registration marks showing below the center stamps.

The 1986 25c Bread Wagon, Scott 2136a, exists imperforate and miscut with full EE bars, denomination and legend in the upper margin. A rarer example exhibits the bottom margin registration line and part of a "counting mark." Datz reports a "few thousand" imperf pairs.

The imperforate 20c Flag Over the Supreme Court of 1981, Scott 1895a, is shown here with narrow EE bars at top. Datz indicates the existence of a "few thousand pairs."

Scott 1901b, the 5.9c Bicycle, is illustrated in an imperf strip of four. Datz reports 480 pairs of the imperf. In the example, there are tips of narrow blue EE bars above each stamp.

Scott 2115a, the 1985 22c imperf Flag Over the Capitol coil is shown next in two forms: first, with EE bars at top, and second, with sheet guideline at bottom. Again, Datz lists a "few thousand pairs."

The more-recent 25c Flag Over Yosemite coil, imperforate and with EE bars in the upper margin, is shown below. It is Scott 2280a, issued in 1988. Datz gives the quantity of imperf pairs as "1000+."

Another example of the imperf Flag Over Yosemite coil, Scott 2280a, shows no portion of the stamps— just the full horizontal registration mark and vertical counting mark. (The line at bottom is printed by ink that clings to the beveled

Continued on the next page

"Exists Miscut;"
Coil Imperforates With Marginal Markings:
A New Collecting Specialty?--

Continued from the preceding page

edge of the plate.) This strip came from a full roll of 100 "non-stamps" found in plastic coil bubble-wrap that bore printing identifying it as a 25c Flag coil.

The 25c Honeybee coil, famous for other strangenesses, is shown here imperforate, with sheet-margin markings at the top. It is Scott 2281a. Datz estimates that "several hundred" imperf pairs exist.

Finally, shown below are two versions of the miscut, imperf, "F" rate Tulip coil of 1991, Scott 2518 (var), with the black horizontal registration mark below the stamps. Datz gives the imperf pair quantity as "1000+." An almost identical stamp, the 29c Tulip, if imperforate and miscut very low like the top example, could not be distinguished from the "F" rate stamp, as the identifying "F" rate legend, "For U.S. addresses only," would be cut away.

It is unlikely that the examples discussed above are the only imperforate coils so grossly miscut as to show upper or lower marginal sheet markings. Datz shows that each of the following imperf coil pairs, not previously mentioned, "exists miscut," which gives you, our members, the opportunity to pursue the search:

Scott 1297a, 3c Parkman precancel, 1975; 1305Eg, 15c Oliver W. Holmes, 1978; 1520b, 10c Jefferson Memorial, 1973; 1616a, 9c Capitol Dome, 1976; 1617b, 6c Justice, 1977; 1618b, 13c Liberty Bell, 1975; 1813b, 3.5c Violins, 1980; 2005a, 20c Consumer Education, 1982; 2112a, "D" rate (22c) coil, 1985; 2135a, 17c Dog Sled, 1986; 2261a, 16.7c Popcorn Wagon, 1988; C82a, 11c Jet Aircraft, 1971.

If you find any of these-- or other-- imperf coil stamps miscut with top or bottom markings, please send me photocopies for publication.

Howard Gates HC73 Box 955, Lake of the Woods Locust Grove, VA 22508

Handsome Foreign Errors--

It often seems that a stamp in which the inscription is missing, leaving an uncluttered vignette, is much prettier than the errorless stamp. Such is the case with Scott 32 of the Faroe Islands, the 1300 Mykines Village with the maroon denomination, country name, etc., omitted. Twenty such stamps exist.

Romania Scott 1081a, the 1.75 lei 1956 Census, is a good-looking stamp with its center inverted. We have no information on how many there are.

--Heinz J. Offenbecher P.O. Box 3022 Alliance, OH 44601

To the Editor--

(Can any of our members answer these questions?)

In the two blocks of Scott 2027-2030 shown below, there is a difference in colors. In the block at the top, the covered bridge and the children's clothing are red, but they're orange vermilion in the plate block below. All other colors are alike on the two blocks. Is one of these a color error, a freak, or an oddity, how common is it, and what is the true color? Any information you can offer would be very helpful.

Howard Frank Springs For It--

We are pleased to report that Howard Frank of New York, a foreign-error collector, responded to the appeal by Romania's Munteanu Liviu with enough dollars to support a year's foreign membership and three quarter-page ads. Howard will receive the Romania 35-lei imperforate pair.

STAMP EXPO '92 MAY 22-31, 1992 — CHICAGO

WORLD COLUMBIAN

QUALIFIED AUCTIONEER

In Honor of the Olympics--

Just because it's an Olympic year, we thought you might like to see a wonderful Polish invert issued to honor the Olympic Games in 1956. It's Poland Scott 751 (var.), 20gr. There are 14 known.

Twenty years ago, in 1972, the United States also issued an Olympic Games series. There is a minor plate flaw-- a broken red Olympic ring-- on the 6c Bicycling, and no flaws in the 15c Running or the 11c airmail Skiing. But Scott 1461, the 8c Bobsledding, is occasionally found in the state illustrated below: minus its "US 8c" and "XI OLYMPIC WINTER GAMES SAPPORO 1972." According to Dr. Stanley Segal, this omission is caused by an excess of solvent selectively washing the black ink out of the lettering's shallower etched areas on the printing cylinder. That makes the stamp a freak, rather than a major error, as the black Olympic ring and two black bobsledders remain.
